

Tour Group Responsibility-TGA/DSC

The person in charge of the TGA/DSC is responsible for all maintenance and upkeep of the instrument. This includes the following:

- Calibration of Instruments (See Manual for Details).
- Instructions on the proper use of the instrument for group members looking to run samples.
- General upkeep of the instrument, i.e. cleaning the TGA pan and DSC wells, etc.
- Fixing of any problems which may require a call to tech support with Perkin Elmer support personnel.
- Cleaning of the area during the Tour Group Lab Cleanup days.
